

PSYCHOLOGY HEALTH AND DEVELOPMENT TRACK DECLARATION

Faculty Advisors: Michael Frank & Catherine Heaney

Name _____

Date _____

ID# _____

Psych Faculty Advisor _____

E-mail _____

Local Phone # _____

Intended Quarter of Graduation (Quarter/Year) _____

Directions:

Use the reverse side of this form to map out a plan for fulfilling the psychology track requirements, which are listed below. For additional information, see the track requirements form found in the student services office. Because this is a tentative plan, students may need to make periodic adjustments in order to fulfill requirements.

You can then declare your track on Axess. It is recommended that the track advisor review your courses and sign the form. Once you have completed the form, bring it to the Student Services Office located in room 100.

Health and Development is ideal for students interested in medicine (especially psychiatry or pediatrics), clinical psychology, education (at all levels), or health psychology. The track includes courses and research opportunities in developmental and abnormal psychology, as well as courses in Human Biology, Cultural and Social Anthropology, Education, and Sociology Departments.
