

Research Assistant Position at Stanford Psychophysiology Laboratory

Lab: Stanford Psychophysiology Laboratory (SPL)

Lab Website: <https://www.spl.stanford.edu>

Project Website: <https://wehab.stanford.edu/>

Supervising Researcher: Pardis Miri

Contact: parism@stanford.edu

Project Description

This project is looking at new ways to facilitate emotion regulation via haptic technology. It provides a unique opportunity to deepen your understanding of research that bridges psychology, computer science, and product design.

Compensation

Work-study, volunteer, or course-credit. We do not have any paid non-work study positions available.

Duties & Time Commitment

Research assistants are needed to help run experiments at Stanford. Duties include running subjects, searching and summarizing research literature, data entry and organization, conducting and transcribing interviews, assisting with data analysis, and research paper write-up. A one-year commitment is preferred.

Qualifications and Expectations

- Highly motivated, eager-to-learn undergraduates or college graduates with a long-term interest in research related to psychology, neuroscience, computer science, or other health/social sciences.
- Ability to work independently and attention to detail are a must! There will be a significant amount of independent tasks, and having a willingness to troubleshoot issues that arise is important.
- Professional attitude, teamwork and communication skills, time management, patience, and reliability
- Statistics, programming, or psychology background are a plus.

To Apply

Please send an email to Pardis (parism@stanford.edu) briefly detailing your motivation for becoming an RA for this project. Additionally please attach a resume/CV, and include your availability (preferred number of hours/week and how long you can commit to volunteering in the lab).
