

## **Research Assistant Position at Stanford School of Medicine, Division of Pediatric Surgery**

**PI:** Claudia Mueller, PhD, MD

### **Project Description:**

This project is exploring how pediatric surgery patients and their family's views of health relate to their actual health outcomes.

### **Duties & Time Commitment:**

Duties include meeting with pediatric surgery patients and their families for participant recruitment. There are opportunities to be involved in additional projects ranging from observation studies in the operating room to working with other pediatric populations.

Applicant must be able to work Wednesday's 1-6pm or possible other weekdays 8-5.

### **Qualifications & Skills:**

Ideal research assistants will be:

Interested in health psychology or medicine

Detail oriented

Comfortable working in a clinic or hospital setting

Ability to work independently

Very comfortable speaking to patients and their families

Past research experience is preferred but not required.

### **Compensation:**

The position will start as a volunteer position with the opportunity to become a paid position.

### **To Apply:**

Please email your CV/resume along with a half page letter describing how you would be a good fit for the position (include class standing, past research experience, goals for becoming a research assistant).
